

3. Write a program to demonstrate the concept of Generic Servlets.

```
1 <!DOCTYPE html>
2 <html>
3 <head>
4 <meta charset="ISO-8859-1">
5 <title>Hyper text2</title>
6 </head>
7 <body>
8 <pre></pre>
9 <form method="get" action="post"></form>
10
11 Enter your name:<input type="text" name="t1">
12 <input type="submit">
13 </body>
14 </html>
```

```
1
2
3 import java.io.IOException;
4 import javax.servlet.GenericServlet;
5 import javax.servlet.ServletException;
6 import javax.servlet.ServletRequest;
7 import javax.servlet.ServletResponse;
8 import javax.servlet.annotation.WebServlet;
9
10 @WebServlet("/hello")
11 public class HelloServlet extends GenericServlet {
12
13     /**
14      *
15      */
16     private static final long serialVersionUID = 1L;
17
18     @Override
19     public void service(ServletRequest request, ServletResponse response) throws ServletException, IOException {
20         response.setContentType("text/html");
21         response.getWriter().println("<html><body>");
22         response.getWriter().println("<h1>Hello, Generic Servlet</h1>");
23         response.getWriter().println("</body></html>");
24     }
25 }
26
```

OUTPUT:
