

## WebDriver Installation and Integration in Eclipse.

```
import org.openqa.selenium.WebDriver;
import org.openqa.selenium.chrome.ChromeDriver;

public class MyFirstSeleniumTest {

    public static void main(String[] args) {
        // Create a new instance of the ChromeDriver.
        WebDriver driver = new ChromeDriver();

        // Open the Google homepage.
        driver.get("https://www.google.com/");

        // Search for "Selenium".
        driver.findElementById("q").sendKeys("Selenium");
        driver.findElementById("btnK").click();

        // Close the browser.
        driver.quit();
    }
}
```
